Step summary

Step	Status	Input	Output	Output dimensions
Step 1 - Container Selection	Result available	Manual input / catalogue	Designed Container	300 x 250 x 600 mm
Step 2 - Palletization	Result available	Designed Container	Manual Pallet Block / column	1200 x 800 x 1000 mm
Step 3 - Transport Container	Result available	Manual Pallet Block / column	Manual Container	12032 x 2350 x 2700 mm

Step 1 - Container Selection

Status	Result available
Input	Manual input / catalogue
Input dimensions	-
Output	Designed Container
Output dimensions	300 x 250 x 600 mm

Key metrics

Requested quantity	-
Max quantity	-
Remaining capacity	-
Volume usage	-%
Max volume usage	-%
Total weight	-
Payload usage	Not set

No validation warnings for this calculated step.

Visualization

Visualization not available.

Step 2 - Palletization

Status	Result available
Input	Designed Container
Input dimensions	300 x 250 x 600 mm
Output	Manual Pallet Block / column
Output dimensions	1200 x 800 x 1000 mm

Key metrics

Main layer cartons	9
Alternate layer cartons	9
Layers	2
Total cartons	18
Used stack height	900 mm
Pallet floor usage	93.75%
Stack volume usage	70.31%
Bottom-carton load check	OK

No validation warnings for this calculated step.

Visualization

Visualization not available.

Step 3 - Transport Container

Status	Result available
Input	Manual Pallet Block / column
Input dimensions	1200 x 800 x 1000 mm
Output	Manual Container
Output dimensions	12032 x 2350 x 2700 mm

Key metrics

Placed units	50
Unplaced units	0
Volume usage	62.87%
Payload usage	0.00%
Loaded volume	48.000 m3
Gross loaded weight	0.00 kg
Occupied L x W x H	12000 x 2000 x 2000 mm
Residual L x W x H	32 x 350 x 700 mm

Load-unit rows

Load unit	Dims (mm)	Requested	Loaded	Weight	Stack
Manual Pallet Block / column	1200 x 800 x 1000	Max (50)	50	0.00 kg	Yes

No validation warnings for this calculated step.
